

March – Business Spotlight

Mediclaims, Inc.

Mediclaims is an ambulance billing service that is always accepting new business. Leslea Adams is the owner and she has two “right hand people” to run the day to day operations of the business. Tammy Campbell is the executive vice president and Michael Bradley is the vice president of operations. They have 28 full time employees in their office located at 101 E. Grand. They are open from 7:30a.m. – 5:00p.m.

Leslea started in 1988 billing insurance companies for doctor’s offices in Ponca City. The business began growing and she added billing for ambulance services. This entails billing insurance companies for the Emergency Medical Services they receive during an ambulance transport. In June of 2002, Mediclaims, Inc. was relocated from Ponca City to Tonkawa.

Mediclaims serves 46 cities in 5 states with their ambulance billing services. Those states include: Oklahoma, New Mexico, Kansas, Minnesota, and Illinois. Their goal for this business is to maximize the reimbursement for the emergency medical services that are provided to their clients. Mediclaims is consulting with the emergency medical technicians to assist with the reimbursement in all areas they service to speed up the process and make sure that everyone gets the most reimbursement they are allowed.

The Chamber of Commerce appreciates Mediclaims choosing Tonkawa for their business operations.
