

Twist 25 cream brings a great new health advantage to people 35 and up, male or female by providing DHEA the right way, as a bioidentical transdermal cream. **The cream is the secret and helps to diminish many aspects of aging.** Oral DHEA supplements do not work as well because oral DHEA is eliminated by the body before it can go to work for you; but with Twist 25 DHEA cream people feel the difference within a few weeks.

DHEA is the most abundant base or building block in our bodies for hormones. We produce DHEA naturally when we are in our "prime," up until about age 25. Then our bodies gradually make less and less DHEA as time passes.

**Premenopausal women ages 40-55 especially like Twist 25,** because it is a natural basic building block for hormones. Hormones are what drive so many aspects of our lives – how productive we are, how we feel, how we interact with others, and more.

Medical research now shows why – most DHEA is actually made and used by the body in the skin. This is why the cream works so well while oral DHEA supplements are minimally effective.

Rub-in 1 pump press of Twist 25 cream every day on thin skin areas. It rubs in nicely; is not greasy or grainy; and leaves no odor. **Twist 25 speaks for itself. Use it every day for three weeks and feel the effects.**

Twist 25 offers many anti-aging benefits and helps thousands of people live happier healthier lives.

# REGAIN YOUTHFUL VIGOR!

## Look and Feel Your Best with Twist 25
