- ◆ 4 – 48 Channels DVR Units
- ◆ Modularly Scalable, Rack Mountable
- ◆ 2 – 16 channel audio recording
- ◆ Feature-Rich Remote Viewing Modules
- ◆ Connect Up to 500!
- ◆ Advanced Motion Detection
- ◆ Automatic IP Configuration

MPEG4
Compression Technology

DVR-POS/DVR-ATM Integration

(Optional) to provide POS/ATM feature. By bringing video and transaction data together, the POS-ATM feature provides visual context awareness to the users and helps reduce shrinkage and fraud loss. The newly-released Ethernet module supports up to 16 POS systems or cash registers to transmit video and context information via Ethernet. Major features include POS live view and playback through WebCam, search by keywords, keyword-triggered IO and PTZ, and abnormal transaction alerts etc.

Access Control Integration

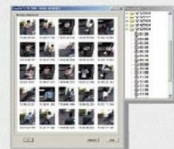

Wiegand Capture box (Optional) can be used to integrate Wiegand Access Control with DVR system. Photo ID and text data can be combined on video and used to retrieve video.

Timeline

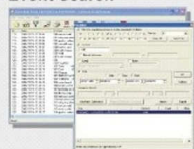

Timeline enables users to locate a specific video recorded on a time frame via an easy-to-browse graphical tool. Timelines can display minutes and seconds, search and playback videos.

Index Search

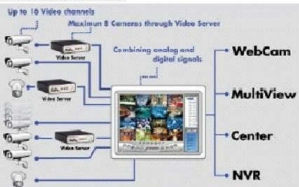

Event Search

- ◆ Quick Search
- ◆ Object Search
- ◆ Instant Playback
- ◆ Thumbnail Browse
- ◆ Backup With Direct Burn
- ◆ Multiple Format Export (EXE, AVI, DVD)
