

Art Glass Millworks

SINCE 1986

Proudly Manufactured in Ventura, California, U.S.A.

THE PERFECT PATIO

More Than a Door...It's a Lifestyle

All Wood or Wood Interior with Aluminum Clad Exterior?

This depends on how much sun and rain exposure your patio doors get. Wood exteriors are beautiful, but are not recommended for high-exposure environments. Durable Kynar-painted aluminum clad exteriors, available on all AG Millworks patio doors are the perfect solution

IN-STOCK CLAD COLORS

Espresso
Brown

White
Linen

Sandcastle
Tan

BIFOLDING PATIO DOORS

Spectacular views, even when they're closed...

Even the largest door panels fold out of the way with ease. Above and right: this 13-foot wide by 9-foot tall system in solid Douglas Fir folds to the interior.

This solid Douglas Fir bifold system has three doors folding to the right, and three doors folding to the left.

*Large openings
create indoor/
outdoor living,
California style.*

OPEN UP YOUR CORNER OF THE WORLD....

Corner units are an especially dramatic way to open up a room and make outdoor living part of your lifestyle.

For more ideas and photographs visit us at:
www.agmillworks.com

Retractable accordion screens are available for all patio door units—even zero corner bifolds!

DREAM BIG

Take your outdoor lifestyle to dramatic new heights and widths! With the guide channel set into the floor, your transition from indoor to outdoor living will be seamless. This option is recommended only for applications with a large overhang or for units in interior spaces.

*Just heading out to the barbecue? The last door on the right can fold with the rest of the doors, but also serves as a single swinging French door, also known as a daily door, when you don't want to fold open the entire unit.
(Available only on units with an odd number of doors panels).*

CREATE YOUR OWN WIDE OPEN SPACES

These two bifolding door systems are 15 feet wide and 10 feet tall and feature five doors that fold in one direction for maximum opening. The exteriors are aluminum clad with a custom-matched color, and interiors are Douglas Fir.

IMAGINE THE POSSIBILITIES

AG Millworks patio doors can be made in almost any size and configuration. We make every unit to order and there is no such thing as an "odd size." We are confident that you will be impressed by the superior quality of our fit, finish and final product.

Replace that old aluminum sliding door that hasn't worked right in years....

BEFORE...

...with a beautiful wood or aluminum clad bifolding patio door system from AG Millworks that folds out of the way so you can really enjoy your patio.

AFTER

Daily Door

Twin shootbolt system secures intermediate doors—Easy lever action releases intermediate panels for simple turn and fold operation.

SILL OPTIONS

Guide Channel Only

Extruded Aluminum Sill with Integrated Weep System available in bronze anodized, brass anodized and clear anodized (shown at right)

Solid Oak Sill with Integrated Weep System

LIFT AND SLIDES

Pocketing Lift and Slide Patio System (PXXXXXXXP) With Six Pocketing Doors and Six Pocketing Wood Screens in Sipo Mahogany. Custom True Divided Beveled Glass Lites, Factory Prefinished. Total Opening Size: 49 Feet Wide x 10 Feet Tall.

POCKETING LIFT AND SLIDE DOORS

Lift and Slide patio door systems are a beautiful way to maximize the opening, especially if designed to pocket, or hide in the wall when opened. Advanced European engineering enables you to slide even the most massive doors with ease, opening up entire walls with one turn of a handle.

Retractable accordion screens are an innovative solution for all types of sliding patio doors. Screens are available up to 15 feet wide by 10 feet, 6 inches in height in a single direction, and for doubles, as shown above, are available up to 30 feet in width by 10 feet, 6 inches in height.

Our available stainless steel recessed track system (left) rises only 1/4" above the finished floor for a smooth transition from indoors to outdoors.

Aluminum and wood sill options are also available.

MULTI-SLIDE PATIO DOORS

Perfect for typical existing patio door openings with smaller door panels, multi-slides generally operate on fixed position stainless steel ballbearing rollers. Multislides are also available with a stainless steel recessed track system, a raised extruded aluminum sill or a raised solid wood sill with inset aluminum tracks.

These beautiful multi-slide patio doors feature aluminum clad exteriors in a custom olive green color, and interiors painted white.

Swinging French Doors are the epitomy of traditional California elegance. Experience premium aluminum clad exteriors coupled with the rich warmth of wood interiors in any imaginable species and finish.

Retractable Accordion Screens are available for all patio doors. When not in use they retract and remain unnoticed on one side of the frame.

Customize your decor with special lite configurations and glass selections. Here, a temperature-controlled wine and spirits room is framed with custom craftsman-inspired French doors. The bar enclosure on the left is a concealed sliding pocket door.

SWINGING FRENCH DOORS

*French Doors with
operating sidelites
provide ventilation
and beauty — the best
combination ever!*

SPECIALTY WINDOWS

Transform your patio from ordinary to extraordinary with the perfect patio window.

Bifolding windows are the perfect kitchen-to-patio pass-through solution. Imagine the good times you and your family will have with these specialty windows in your outdoor life. What will pass through your patio windows? Fun, food, love, laughter?

Get together with your sash and door professional today and get your outdoor living plans underway!

Radius front bifold pass-through windows bring a dramatic focus to the patio and your entire backyard world.

Pushout casements with friction hinges and a swing-in wood screen.

Aluminum clad swing-out French doors and a large picture window.

Bow-front floor-to-ceiling fixed windows.

*Tilt and Turn Windows —
European Styling,
Practical Features.*
