

## WHY THE LIVINGWATERS™ WAY IS THE HEALTHIEST WAY!

- ✓ **SUPERIOR PERFORMANCE** – Produces better quality water than the even the best reverse osmosis units without water waste. More dangerous contaminants are removed. Healthy alkaline minerals are preserved! Water tastes refreshingly natural.
- ✓ **BIOLOGICALLY SAFE** – Our systems produce water that is guaranteed safe from dangerous bacteria, cysts, molds, and other similar pathogenic organisms. No other technology besides distillation can make this claim!
- ✓ **WORKS IN EMERGENCIES** – Our systems produce safe water without electricity or the need for high water pressure.
- ✓ **FAIL-SAFE** – The most advanced and proven-dependable technologies are used in a patented multi-stage redundant design. Contaminants cannot “break-through” making your water unsafe without warning!
- ✓ **THERAPEUTIC** – Patented technology dramatically increases the redox potential of water. Every glass becomes a healthy anti-oxidant that boosts your immune system. Water in bottles stays fresh because it can’t support the growth of bacteria!
- ✓ **CONTINUOUS FLOW** – You can’t run out of clean water. Use it to wash food and vegetables, as well as drinking.
- ✓ **SUPERB VALUE** – Durable, top-quality, components are easy to install and maintain. Your system upgrades to the newest technology with a simple filter change so it never becomes obsolete!

SAFEWATER™ Technology is available for:

- HOMEOWNERS
- ICE-MAKERS
- APARTMENT DWELLERS
- WHOLE-HOUSE TREATMENT
- COMMERCIAL & INDUSTRIAL APPLICATIONS
- TRAVEL
- RV'S
- DISASTER RELIEF
- FARMS & AGRICULTURE

WITH  
**SAFEWATER™ TECHNOLOGY**

**CLEAN WATER**  
**YOU CAN TRUST!**

Products designed in accordance with  
recommendations made by Lono Ho'ala  
– author of the best  
selling book on water:

*Don't Drink the Water (without reading this book) The Essential Guide to Our Contaminated Drinking Water and What You Can Do About It*

**Endorsed by Dr. Andrew Weil, M. D.**  
**Published by Lotus Press**

ISBN: 0-9628882-9-X, 112 pages, \$11.95

# LIVINGWATERS™ SAFEWATER™ TECHNOLOGY

*Independent laboratory tests confirm that SAFEWATER™ TECHNOLOGY is reliable and effective at removing 100% of pathogenic organisms like, E. Coli, Shigella, Salmonella, and Klebsiella bacteria, as well as cyst producing pathogens like Cryptosporidium and Giardia. It also reduces dangerous chemicals and heavy metals as well as reverse osmosis – all without the need for electricity, high water pressure, or water waste!*

## CERAMIC/KDF55® PREFILTRATION TECHNOLOGY

SAFEWATER™ TECHNOLOGY employs a silver impregnated Doulton ceramic microfilter to which has been added a remarkable media known as KDF®55.

This patented, cleanable and reusable dual-media filter not only keeps dirt and suspended solids from

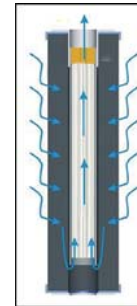

damaging the elements that follow, it also removes chlorine and its disinfection by-products, heavy metals, and 99.99% of dangerous microbes like molds, bacteria, viruses, and cysts like cryptosporidium and giardia.

This remarkable new cartridge lasts far longer than any form of activated carbon, matches or outperforms reverse-osmosis and ultraviolet lights on common water contaminants, wastes no water, works at most water temperatures and pressures, and works in cloudy water. Treated water becomes bacteriostatic. This means that bacteria can't grow in treated water so you can dispense water into bottles and it will remain fresher, longer.

## CARBON BLOCK/STER-O-TAP® ULTRAFILTRATION TECHNOLOGY

STER-O-TAP® consists of a bundle of ultra-filtration membranes embedded in an ultra-pure carbon block cartridge. In-line pressure forces water through the carbon-block wall to the inner bore of the capillary bundle. It is a new, patented technology that matches the performance of the finest reverse-osmosis systems.

✓ **STER-O-TAP®** achieves an astonishing 8 log (99.999999%) removal rate of even the smallest bacteria rendering even contaminated water completely safe to drink.

✓ **STER-O-TAP®** membranes cannot "break through" causing water to become unsafe without warning.

✓ **STER-O-TAP®** does not waste water.

✓ **STER-O-TAP®** dispenses a continuous, ample supply of water. You can't run out, so you can use purified water to wash vegetables, boil pasta, make beverages, and pour unlimited glasses of water.

✓ **STER-O-TAP®** does not require a storage tank. Apartment dwellers can invest in a system that is easy to move. Homeowners free-up space under their sink.

## FLUORIDE/NITRATE/CHLORAMINE REMOVAL TECHNOLOGY

Recent studies reveal that ingestion of fluoride increases cellular uptake of lead. Over time, this can lead to chronic depression as well as the disruption of delicate hormonal balance. It is also a contributing factor to "brittle-bone" syndrome in the elderly.

If your water supply is a well and you live near an agricultural area, nitrates can leach into your water supply from animal waste and/or the application of fertilizers to fields. High levels of nitrates can be very hazardous to health. They can be converted into cancer-causing nitrosamines by stomach acid, and prevent red-blood cells from doing their job of carrying oxygen to the body's organs.

Chloramine is commonly used by municipalities to disinfect water. It is irritating to the skin and lining of the gastrointestinal system and evidence suggest that its disinfection by-products are potent carcinogens. Unfortunately, it is very difficult to remove from water - as it passes right through reverse-osmosis and distillation systems unaffected.

**ONLY LIVINGWATER'S™ SYSTEMS** are configured to effectively remove fluoride, nitrates, and chloramines.
