

Beautyworld Pty Ltd Salon Pricelist - November 2011

Xtended Wear Formula

Welcome to Beautyworld.

We have been supplying professional products to the Australian Beauty industry since 2001.

We began with a small range of nail products, but have now grown to over 800 products, some of which we manufacture here in Australia. Having owned our own salon we understand very well the issues confronting salon professionals and have helped thousands of salon owners and individuals start their own beauty business venture as well as continue them profitably.

Please feel free to contact us if we can be of service to you.

About Us

Many of our products are the result of our own manufacture or are based on our relationships with international overseas manufacturers.

We manufacture JOSS nail polish and Perfect Nails Advanced Gel Colours here in Australia from imported materials. Most of our acrylic systems are blended here to our own specifications including JOSS coloured acrylics.

Similarly we blend and package all of our essential oils and massage oils from bulk supplies from all over the world.

For our depilatory and paraffin items we have partnered with the fastest growing beauty company in the UK, Hive of Beauty, and thus ensure excellent quality and pricing within these product ranges.

Finally for a host of other products in our range we have used the resources of manufacturers in Europe, Asia and North America, to provide cost efficiencies and a wide variety of product choice.

Buy 2 & get 1 FREE (= \$17.18 /kg)
\$159 PER CARTON OF 24 (= \$15.59/KG)**

OPT5714

Chocolate. Lower operating temperature plus the added moisturising and soothing benefits of cocoa butter. Suitable for fine, normal or coarse hair types.

What is Hot Film Wax ?
 Film waxes use new generation plasticisers to ensure that the wax remains flexible after cooling. As a result the product never becomes brittle during removal. In addition the plasticisers allow the products to be used at cooler temperatures resulting in much improved customer comfort. The Brazilian Hot Film wax is recommended for dense and stubborn hair growth and does not contain untreated resins which ensures a very low allergy risk.

Hint: If you are using Film waxes for the first time please **DO NOT** mix them with any other hot waxes as the performance of the product may be inhibited.

Hot Wax

Hive Brazilian Hot Film Wax 500g

\$10.95
Buy 11 & get 1 FREE

Hive Chocolate Cartridge **100g x 36**

\$119.95

HOB6842

\$3.50 each

80g & 100g Cartridge Wax Removable Rollerheads & Accessories

When using the 80g or the 100g removable rollerhead cartridges we strongly suggest that you use the Hive rollerheads with them. Other rollerheads may fit onto the cartridge, but the rollerhead may not be properly aligned when tightened. Similarly we do not suggest that you attempt to use Hive rollerheads on other brands of wax cartridges. The rollerheads shown here can be used for both the 80g and 100g cartridges.

	Hive Warm Wax Cartridge 80g x 36 (Fits Clean N Easy heaters)	\$89.95	HOB6620

Paraffin Therapy

Hive Low Melt Paraffin 1kg.

A low melting point paraffin designed for greater client comfort. Each 1kg pack comes as 24 small blocks which makes topping up paraffin baths much easier. Tea Tree Peppermint & Patchouli (HOB5677)

\$14.95

Beautyworld Paraffin 450g

Available in Peach, Lavender or White (Unfragranced)
 Peach BWP001
 Lavender BWP002
 White BWP003

\$6.95

Hive Spray Paraffin Cartridges 80g , 6 per pack

A low melting point product for greater client comfort. Spray paraffin provides clients with concerns about cross contamination from paraffin baths peace of mind. It is also an excellent option for mobile therapists. The cartridges are best heated in the Hive Mini Pro Cartridge Heater or the Hive Multi Pro Cartridge Heater. Before using the cartridge please ensure that the locking mechanism has been released and that the paraffin is completely melted. Do NOT attempt to use cartridges where the product is only partly melted as this may damage the spray mechanism. Available in Peach (HOB5682) , Lavender (HOB5686), Unfragranced (HOB5680) or Tea Tree Peppermint and Patchouli (HOB5684)

\$17.95

Acrylic Systems

Please take a few moments here to review our different acrylic systems to understand why they have been developed and therefore which one might best suit your needs.

Please note that ALL of our monomer systems are MMA Free.

Perfect Nails Acrylic System. One of a few products left on the market that is HEMA Free. But, what the heck is HEMA ?

HEMA is 2 hydroxyl ethyl methacrylate and in terms of the history of development of acrylic systems for nail artists it is a relatively new development. Adding HEMA to a product does give some advantages and some disadvantages.

On the positive side HEMA does improve adhesion and also modifies the melting point of acrylic liquid mixtures thus avoiding crystallization problems in cold conditions. On the negative side HEMA is between 5 to 10 times more likely to produce allergic reactions in clients than ethyl methacrylate does. Additionally acrylic liquids with HEMA have a much tolerance in usage with regard to monomer/polymer ratios.

Perfect Nails Gold Signature Acrylic System.

A primerless acrylic system with HEMA added. The system is temperature tolerant and gives excellent adhesion and workability under all conditions. Stabilised product chemistry ensures that yellowing does not occur.

Nail Advantage Acrylic System .

Nail Advantage Acrylic System uses the latest HEMA free technology at an affordable price. The system is temperature tolerant and easy for students and novices to use.

Joss Coloured Acrylic Polymers.

These coloured polymers for nail art have been formulated to work with most monomer systems. They will work with all of our monomers, with best results from the Joss Multifunctional Monomer or the Perfect Nails Gold Signature Monomer. These products are blended in our factory for improved workability, time taken to set and colour enhancement.

Perfect Nails Acrylic System

Due to the “forgiving” nature of this product students may find this product easier to begin with. During cold conditions it is possible that the Perfect Nails Monomer will crystallize before polymerizing. This happens when the monomer liquid returns to a solid state before it can polymerize. To prevent this use the Fast Set polymer OR consider adding a desk light to your table. Often the warmth from the globe will allow a proper curing to take place.

If you are a technician that is able to work quickly you may prefer to use the Fast Set polymer all of the time to reduce the time taken to complete your work.

From lightest to darkest the pink polymers are as follows: Hint of Pink, Pink Glow, Pink, Extra Pink. Cover Pink is quite opaque and can be mixed with Clear for customizing.

Cover Nude and Cover Pink Nude should be used as is for best results.

This is a HEMA free low allergy formulation.

Perfect Nails Gold Signature
Acrylic System

This product does contain HEMA

It is important therefore not to get into a habit of using the product too wet. NEVER use monomer to smooth the surface of the finished nail—you are exposing your clients to the risk of HEMA allergy in the long term.

Most nail techs are able to use this product without primer. If you find that some clients require a bonding agent to get best results then consider using a very small amount of the Adhesion Enhancer. DO NOT use too much—you may actually get less adhesion instead of more !

The pinks in this range vary from lightest to darkest in the following way: Baby Pink, Perfect Pink, Hot Pink, Super Pink.

Cover Pink is quite opaque and may be diluted with Clear for a customized colour. Cover Natural and Cover Pink Natural should be used as is for best results.

Perfect Nails Lite Cure Acrylic System

Handy Hint.

This system requires the use of UV light to cure the polymer/ monomer system. It is odourfree and requires a drier usage than traditional acrylic systems i.e less monomer per gram of polymer.

This system can be especially useful for clients that require an odourfree system and/or who only perform acrylic services infrequently. Because the system will not cure until UV exposed clients have ample time to ensure to apply the product.

Nail Advantage Primerless Acrylic System

Handy Hint.

This is a budget priced primerless acrylic system formulated for use by schools and salons.

Although less expensive than many other comparable systems the product gives good results and excellent product control.

Perfect Nails Advanced Gel System

Perfect Nails Advanced Gel System has been part of our product range since our very early days and today is widely used around Australia.

To the best of our knowledge this is the only Coloured Gel range which is actually made in Australia—all other products are imported. We have crafted our colours for ease of application and to give the most natural looking finish possible.

Handy Hints

The instructions for application of the gel are available on our website (www.beautyworld.com.au) for download. You will also be able to view colour photographs of the colours in the range OR request a Perfect Nails Coloured Gel colour chart by contacting us. For gel toes a simple application is to prep the nail as usual for any enhancement and then apply two thin coats of colour & then a coat of Final Gloss. After each application a tacky layer will be left, but it is only necessary to remove the tacky layer of Final Gloss when you are finished. Our Final Gloss gel has the highest possible sunscreen level that we can put into the product and is guaranteed NEVER to yellow !

Perfect Nails ViViGel System

<p>ViViGel is a brush on soak off gel lacquer system designed for salon professional use.</p> <p>ViViGel is a solvent free system that ensures that the product has consistent application properties from the start of the bottle to the end. It has high levels of pigment so that often only a single coat of colour needs to be applied, making application times less and removal quicker and easier. ViViGel is LED curable for greater efficiency and also compatible with JOSS nail art.</p>

Gel Lights

9W Replacement Tube UV01 \$19.95

9W Replacement bulb ONLY for 36W Sensor Light NS117 \$14.95

6W Replacement Tube US134 \$19.95

9W Budget Gel Light.
Ideal for students, novice nail technicians or salons that only require infrequent gel light use. NS88

\$59.00

36W Gel Light.
A budget "tunnel" type light as is commonly used in salons. Features a 2 minute or 3 minute timer plus fuse protection. NS87

\$99.00

36W Gel Sensor Light. NS97

36W light with sensor that activates illumination of bulbs when the clients hand is placed into the light. Features a digital timer able to select any time setting in 5 second increments from 5 seconds to 600 seconds. Pink visor reduces possibility of UV light reaching clients eyes and hand rest inside light allows for greater client comfort. PLEASE ONLY USE REPLACEMENT BULBS NS117 IN THESE LIGHTS.

\$139.95

36w GEL LIGHT European design UV36W
Our 36W lights are German design and offer a number of features not found in other 36W tunnel lights. Bulbs are easily changed by removing the floor of the light, which results in unrestricted access. Each light is also supplied with a spare floor (blue coloured insert in second image). The light has a 2 minute timer or can also be set to run continuously, although we do not recommend that the light runs for more than 10 minutes at a time, especially in the warmer months.
For gel toes remove the floor and place the light over the clients feet - How easy is that !

\$195.00

Recommended for curing CND Shellac UV systems.

45W Two handed Gel light.
Features removable floor, plus two drying fans. Five UV timer settings from 90 seconds to 5 minutes. Fuse protected.

NS89

\$179.00

12W LED Light NS115
Features removable floor and 4 timer settings (5 sec, 10 sec, 30 sec, 60 sec) Fuse protected.

\$239.00

LED lights will not cure all gels. Clients must ensure that their gel system is LED curable before purchasing a LED light
