Newburgh, NY February 17, 2008 - The ALNRS held it's annual Pre-Season meeting this past weekend. Several veteran teams along with some new rookie teams attended the meeting to hear Series Director Michael A. Vasquez, Sr. discuss the upcoming 2008 ALNRS Season. The director discussed the 2008 Race Procedures and also discussed some improvements that will be made heading into the 2008 Season. Following a quick lunch break the teams were given some basic set up techniques from ALNRS Team owner Scott Tuthill. John Berardi who is the official chassis repair specialist for the ALNRS was on hand to go over some of the new tech tools that will be introduced for the 2008 season. These tools and the new scaling system will help the series provide a more thorough and efficient tech inspection off all the ALNRS cars. The ALNRS would like to give a special thanks to John Berardi and his family for their hospitality in hosting the meeting.

Next up on the 2008 ALNRS Schedule is the annual Speedway Expo in Springfield, MA Feb 29 - March 2. Three ALNRS teams will be on hand to display their new 2008 race cars. So Stop by the booth and learn all about the ALNRS and the stars of tomorrow.
