INSTORE DESIGN STUDIO

## **Taking Care of your Precious Timber Furniture.**

As timber is a natural product, it needs to be looked after and cared for with the same affection as a new tree in the garden or even a tender newborn.

Timber inherently does contain moisture, albeit at low levels and as such should not be exposed to direct sunlight or heat from any source. Doing so could cause irreparable damage.

Most timber products come with a stained and lacquered finish, which only requires any light dust to be removed with a slightly damp cloth. For removing stubborn dirt or residue, a small amount of mild soap could be added to the damp cloth.

USE OF SILICON BASED POLISHES SHOULD BE AVOIDED, as the silicon tends to build up on the surface.

SIMILARLY OILS AND WAXES SHOULD BE AVOIDED, as they tend to simply smudge the finish, which leaves finger marks and is difficult to remove.

DO NOT USE ANY ABRASIVE CLEANERS OR CLEANING INPLIMENTS UNDER ANY CIRCUMSTANCES!

Scratches and dents can often be repaired to a very satisfactory level with various products and methods depending on the type and degree of damage. Please see one of our sales staff for the best advice.

Look after your investment and you will enjoy years of pleasure from it!

Thankyou  
Heavenly Interiors after sales care.
