Background & Experience

The term “put your nose to the grindstone” was made for J.T. His never-quit attitude helps him tackle the toughest of obstacles our advisors face – and out on the trails in his custom 4x4 Jeep. J.T. will be at the office until 7:00pm most nights grinding out creative works of art for our firm’s top advisors, but when he sneaks away he’s out in his Jeep, fishing with his father, or working on his ’62 Cadillac.

You could say mathematics are a paternal gene in the Bell family. J.T.s father, Ward Bell always excelled in math. In fact, he studied to be an actuary in college. J.T. inherited this trait, taking AP Calculus in high school (Brophy College Prep in Phoenix), Statistics in college, and majoring in Finance and Computers at the University of San Diego.

J.T. harnesses his creative wisdom, his unmatched product knowledge, and his intuition for mathematics to come up with outside-the-box solutions our advisors could never dream up on their own. The result: increased revenue to our advisors and a solution that solves the retail client’s needs and desires.
