SCIENCE CLASS TEACHES STUDENTS ABOUT THE WONDERS OF NATURE

Our Savior Christian Academy provides children with the four Rs of education- reading, writing, arithmetic, and most importantly, religion. We teach from a biblical perspective, not the world view. For example, during a recent study on plants, fourth grade students not only learned about plants and its different parts, they also engaged in conversations that God is the creator of all things. "We discussed how God had placed Adam in the Garden to take care of the plants and animals," noted Cooperative Instructor Shelly Barnes, "and how God provided the plants to put off oxygen that Adam needed to breathe."

***"In the beginning, God created the heavens and the earth."
(Genesis 1:1 ESV)***

"(It is the) understanding of how marvelous God's creation is that gets me excited about science," stated volunteer instructor and retired medical chemist Keith Bunselmeyer. "God's Word does not change. While science as we know it has had to modify or change its thinking many times," elaborated Bunselmeyer. At OSCA, students are immersed in God's Word and have open conversations about the beautiful world our God has created. As stated in the Bible, "For by him all things were created, in heaven and on earth, visible and invisible, whether thrones or dominions or rulers or authorities—all things were created through him and for him. And he is before all things, and in him all things hold together." Colossians 1:16-17 (ESV).
