

Defense Technologies International Corp.

EXECUTIVE SUMMARY

<http://www.defensetechnologiesintl.com/>

dtii@defensetechnologiesintl.com

1 800 520 9485

THE FOLLOWING IS INTENDED AS A SUMMARY DESCRIPTION OF THE BUSINESS OF PASSIVE SECURITY SCAN, INC. AND HAS BEEN PROVIDED FOR INFORMATION PURPOSES ONLY. THIS DOCUMENT DOES NOT CONSTITUTE SOLICITATION MATERIALS AND IS NOT PROVIDED IN CONNECTION WITH, NOR SHOULD IT BE CONSIDERED PART OF, AN OFFERING OF PASSIVE SECURITY SCAN, INC. AS SUCH, PASSIVE SECURITY SCAN, INC. MAKES NO REPRESENTATIONS OR WARRANTIES AS TO THE STATEMENTS CONTAINED HEREIN.

Defense Technologies International Corp. (DTII)

a Delaware and US Public Corporation trading its common stock on the OTC Market under symbol **DTII**.

DTII owns and controls '**Passive Security Scan, Inc.**' (**PSSI**) a private Utah Corporation.

PSSI owns and controls the World-Wide Rights to the **Passive Scanning Technology™** and its first product the **Passive Portal™**.

The **Passive Portal™** uses advanced passive sensors to detect common metallurgy used in knives, firearms, and other weapons, without the requirement of emitting electromagnetic-radiation of any kind. A passive sensor is an electronic device that responds to input directly from the physical environment that it is placed in. This means that passive sensors can gather specific data through the detection of vibrations, light, electromagnetic-radiation, heat, cold, or other phenomena occurring in that environment, with **Zero-Emissions**. Examples of passive sensors include: thermostats and thermometers, infrared motion sensors, common smoke detectors, and radiation monitors. With our *Passive Portal™*, we non-invasively detect weapons and other ferromagnetic items by reading the subtle changes that these items cause in the Earth's magnetic field while they pass through the Portal.

DTII is a fully reporting public corporation with its common stock presently quoted on the OTC Pinks.

The Company plans to upgrade to the OTC-QB in the near future and will when qualified file for a listing on the US Nasdaq exchange.

DTII leases a 4,700 sq. ft. Production and Assembly Plant in Rexburg, Idaho.

corporate address: 2683 Via De La Valle, Suite G418, Del Mar, CA 92014

Passive Security Scan, Inc.

is a subsidiary of

Defense Technologies International Corp.

A US Public Corporation

trading its common stock on the OTC market under the symbol 'DTII'.

Passive Security Scan, Inc.

www.passivesecurityscan.com

Our Mission Statement

“To provide safety and security through innovative technology.”

Passive Security Scan is the manufacturer and developer of the

Passive Portal™.

Weapons and contraband detection system using non-x-ray, zero-emission ***Passive Scanning Technology™.***

Our *Passive Scanning Technology™* (US Patent 7408461) non-invasively detects weapons and contraband by reading subtle changes in the Earth’s magnetic field.

Traditional metal detectors are ‘active-sensing’, meaning they emit potentially harmful radiation that may cause damage to our bodies with prolonged or frequent exposure.

Instead of using x-rays or other forms of emission, sensors located in the *Passive Portal™* establish baseline readings of Earth’s magnetic field and alert when firearms, knives, weapons are present during screening.

This simple yet superior technology provides many advantages over standard, ‘active-sensing’ metal detectors, including: a light-weight and portable design, non-intimidating appearance. Low-usage power outlet and battery operation, rapid scanning rate, increased threat detection accuracy, improved ease of use, and significantly lower cost.

The *Passive Portal™* is proudly manufactured in Rexburg, Idaho.

Business Overview

PASSIVE SECURITY SCAN, INC. is a private, Utah corporation with majority control held by Defense Technologies International Corp. (OTCPinks-DTII).

Passive Security Scan's core ideology is to provide superior solutions for today's new world threats and risks.

The Company focus is the industry of security— a rapidly expanding, multi-billion-dollar market.

Passive Security Scan is primarily positioned to enter the, until now, virtually untapped public-school market segment for threat detection security.

In addition to the public-school market, Passive Security Scan technologies are in increasing demand in airports, stadiums, nightclubs, bars, government buildings, business offices, medical facilities, and military bases.

The Company has exclusive worldwide licenses for *Passive Scanning Technology*[™], and is intent on filing additional patents for future innovative products.

Passive Security Scan has assembled a respected team of experts with decades of experience, with a broad spectrum of executive, international, and corporate experience, coupled with extensive diplomatic relationships in the USA and abroad.

Company Overview

Passive Security Scan, Inc. formed in 2017 with the initial goal of bringing the *Passive Portal*[™] to market.

The *Passive Portal*[™] has undergone years of significant research and development processes, including extensive in-house testing and public-school beta testing.

Passive Security Scan advanced and fully developed the technology, and the *Passive Portal*[™] is now ready for market.

Passive Security Scan currently leases a 4,700 sq. ft research and manufacturing facility in Rexburg, Idaho. The Company will establish distribution and maintenance facilities throughout the USA and internationally to service and support the growing market and customer base.

Passive Security Scan has established relationships with experienced, commission-based salespeople in over 30 states in the public-school market that are intent on, and fully capable of, selling the *Passive Portal*[™] directly to decision makers.

Passive Security Scan plans to present its technology to state and federal government departments, as well as other major markets including, but not limited to; airports, sports stadiums, and hospitals.

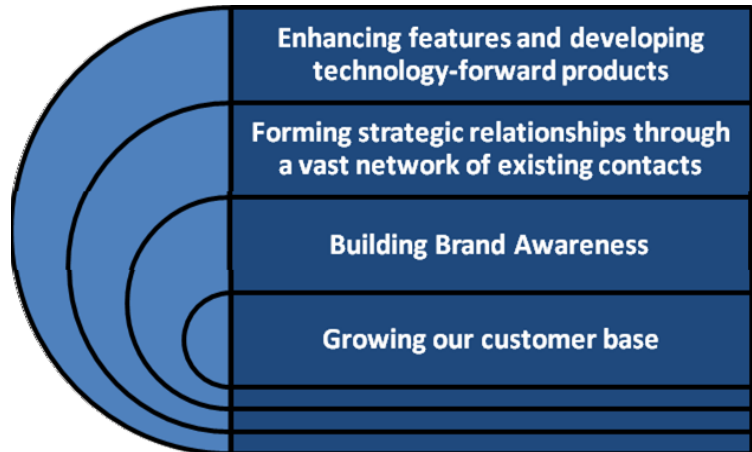

Passive Security Scan will be marketing directly, and its products be made available, to 'direct-to-consumer' markets such as business offices, private medical facilities, music and arts venues, restaurants, bars, and nightclubs.

Passive Security Scan will continue to develop future products, including the *Passive Wand*[™], a hand-held weapons detection unit utilizing the patented *Passive Scanning Technology*[™].

Passive Security Scan aims to generate revolutionary products that increase security and provide peace of mind, while providing cost savings over current products in the market.

Key areas of focus include:

1. Selling peace of mind to our customers through effective security products.
2. Encouraging the adoption of new technologies by providing functional and budgetary viability.
3. Maintaining a company whereby innovation and integrity lead to a prosperous future for our company and shareholders.

Management Overview

Management Team & Advisory Board

Merrill W. Moses, President and CEO
Luke Hillbery, Sales and Marketing Director
David Corey, Production Manager
Rick Fluck, Technical Director
Michele Mase, Public Relations Director
Ernst Hiestand, Admin. Advisory Officer
