

February Newsletter

Welcome to our February edition of our newsletter! We are excited to share what we have all been learning about and our experiences throughout the month. Spring is in the air and the children have noticed the days are getting brighter. A highlight in the month of February was Valentine's Day. We made cards to show our families how much we appreciate them, and we explored love and gratitude.

Rainbow Room

This month we spoke about the weather, Valentine's Day, dinosaurs, and Spring. The weather is part of our everyday lives. Each day we learned about a new type of weather with different arts and crafts and activities. The parachute was everyone's favourite.

We made cards and crafts for Valentine's Day for the people we love. One of the children showed a lot of interest in dinosaurs, so following our children's lead we decided to have a week about dinosaurs. Our final week we began Spring. The days are getting longer, and the flowers are starting to grow, we had great fun learning about it.

Wobbler Room

During the month of February, we had a lot of fun in the Wobbler room. We provided lots of opportunities to create art. This promoted the children's fine motor skills. We explored mark-making and learned about shapes by painting with balls and squares in cardboard. We also made Valentine's Day cards for our families.

~Toddler Room~

In February, we learned about Valentine's Day, Pancake Tuesday, musical instruments and much more. The toddlers really enjoyed making beautiful art for their families. We made colourful Valentine's cards, hearts and flowers in class which they loved! Sticking with the theme of Valentine's Day, we also made pink play dough from scratch and had great fun making pretend pancakes and donuts with the play dough.

The toddlers have a great interest in music and dance! We had so much fun exploring new musical instruments and their sounds, while making our own music. Sensory exploration was another theme for the month of February which the children enjoyed. The children got the opportunity to finger paint, and paint with sponges while exploring both the soft and tough sides of the sponge.

~ECCE Room~

In the month of February, we explored the children's interest and learned about the life cycle of a frog. We also made healthy and delicious kiwi smoothies!

We also learned about fire safety. We did many fire drills, and the children made their own fire engines.

We also celebrated Valentine's Day by making Valentine's cards and delicious rice krispies cakes with marshmallows.

We also learned about dinosaurs and discussed how to take care of our bodies, like brushing teeth and washing ourselves. What a busy month!!
