

Now that we are deep into spring, we are learning about our environment and how it changes during this season!

## Poppies

With the promise of good weather and all the lovely spring things, the learning of the ECCE class was structured around themes of growth! They learnt about the sea world, the farm, insects, and plants! They sowed their own little bean seeds and watched ten grow into seedlings and plants! They did crafts of insects, sea creatures and even fun activities like milking a cow! Well, not a real cow, they used a glove with water in it to simulate how to milk a cow!

They also did a lot of free play, puzzles, painting, and academic learning of course. It was a very fun month, especially because we all got to enjoy some good sun in the playground too!

Hibiscus class kids had an amazing month too! Following the Spring themes, this class of artists made a lot of insect and flower crafts with paint! They learnt about a whole new style of painting where they squeezed paint onto a paper and folded the paper up to make a beautiful print! They worked hard on their fine motor skills too, tracing all the letters they have learnt so far! And of course, they had the best time outdoors in the sun too!

The Daisy's class had a great month! The themes of the month were around Spring; we learnt all about flowers and insects! They did some extra fun sensory play with bugs in the mud! They learnt about some very muddy farm animals, made some art with their paw prints and helped to clean them up! They made crafts of insects with shapes that they traced and cut, working on their fine motor skills, and spent a whole lot of time working on their gross motor skills of jumping, running and climbing in the playground!
