WHAT'S DIFFERENT ABOUT AN *Art Glass Etc., Inc.* ENTRY DOOR?

MORTISE & TENON CONSTRUCTION

Have you ever admired a historic house, wondered how it could stand strong and square after hundreds of years? It's all in the construction. "Mortise and tenon" construction is a time-tested method of locking wood joints together. The method involves cutting a mortise, or hole in one piece of wood and forming a tenon, or projecting part on another, and fitting them together tightly to form a secure bond between the two components.

ART GLASS ETC., INC. constructs every raised molding door with this centuries-old method, and takes it one step further, by applying waterproof bonding agents inside the joint to permanently join together the stiles and rails, which are the vertical and horizontal structural components. Doors without raised molding are constructed with dowels and the same waterproof bonding agents.

SUPERIOR STRENGTH

All stiles and rails in our oak entry doors are laminated—not to be confused with veneer. We take two boards of superior quality four-quarter (1" thick) Northern American Red Oak and bond them together to form a sort of sandwich around the glue. This method creates stress balanced components of solid wood with maximum resistance to warping. ART GLASS doors are solid wood, not veneered.

The majority of doors pictured in this brochure are shown in 36" x 80" dimensions. Sidelites are generally shown in 18" x 80" dimensions. Doors and glass manufactured to other sizes may differ in appearance. Please ask your dealer for a drawing if this concerns you.

SOLID PANEL CONSTRUCTION

Even the raised panels in our oval doors are safeguarded against cracking. A full 1 5/8" thick, each panel is bonded by finger-locking glue joints. Floating panel assembly insures further resistance to cracking and splitting.

HIGHEST QUALITY WOOD & SELECTION METHODS

We choose only the highest grades of Northern American Red Oak, White Oak, Genuine Mahogany, African Mahogany, Sipo, Walnut, Cherry, Poplar, Cedar, Clear Alder and Knotty Alder. Other woods are available by quote. We carefully match each piece by grade, density, color, texture and grain.

PREHUNG ENTRY SYSTEMS

All Art Glass Etc., Inc. entry systems are available prehung, and prefinished if you wish. Your door is sized, hinged, and its frame is weather-stripped and ready to slip into the wall. Choose from a variety of sills, casings and other features.

A copy of our special guide: "Door Care and Handling" and our 5-Year Limited Warranty is available from your dealer.

California ✕ Craftsman ✕ Series

The Craftsman era, which spanned roughly 1900-1939, was one of great creativity, appreciation of nature, and simplicity of design. For working class families, Alladin Homes offered kits with everything needed to construct one's own craftsman cottage. For the wealthy, renowned architectural firms like Greene and Greene designed extravagant craftsman estates like the Gamble House of Pasadena. Art Glass Etc's California Craftsman doors honor this tradition with authentic designs reminiscent of nature, and unique Tiffany style glass inserts.

The Craftsman Collection

Serengeti

SERENGETI CRAFTSMAN STAINED GLASS

doors in Walnut, 3-0 x 8-0 with 1-6 x 8-0 sidelites, Dark Walnut finish.

Art Glass Etc., Inc.

Craftsman Arch Lite Door

With Poppy glass in Quartersawn White Oak, English Chestnut finish.

Craftsman Arch Lite Door

With Water Lily glass in Quartersawn White Oak, English Chestnut finish.

Tiffany Craftsman Doors

Tiffany style glass inserts are made with the finest hand-selected, hand made colored glass, assembled with a copper foil and lead technique. No two sheets of colored glass are identical, so slight variations in color hue may occur in each glass panel. This individuality should not be considered a defect as it adds intrinsic value to your doors. Doors with Tiffany style glass inserts must be viewed with light behind the glass in order to bring out the complete effect, as the surface colors of the glass sheets provide only one dimension of the beauty of each individual glass panel.

Craftsman Arch Lite Door

With Dragonfly glass in Quartersawn White Oak, English Chestnut finish.

Peninsula Door in Clear Alder with matching sidelites, Terra Cotta finish, Sedona distress, Craftsman peekasy door in Copper Oxide.

Three Lite Craftsman Door with Tree of Life glass. Matching one lite sidelites with Tree of Life glass. Clear Alder, Mojave distress, Sangria Finish. Also available with clear or clear beveled glass. Please see note on page 65 regarding Tiffany-style glass inserts.

European Combination Doors

Rustic Combination Door

Knotty Alder, Whiskey finish, Mojave Distress.

EUROPEAN COMBINATION DOORS are a great multi-purpose solution for a side entrance to the home or garage, the laundry room, or anywhere you might want some options for ventilation. These multi-function doors have a tilt & turn sash of any size within the door (Half-lite tilt & turn sash is pictured on this page). A wood-trimmed fixed screen keeps bugs out and lets fresh air in. Combination doors are available in all wood species. Choose traditional design and wood species to match door and window styles in more formal homes, or rustic, as shown here.

Rustic Combination Door

Finish Selections on Alder

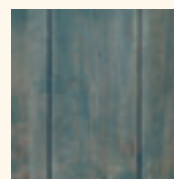

Sandstone

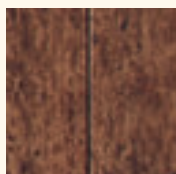

Bucksksin

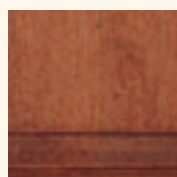

Sagebrush

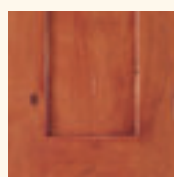

Indigo

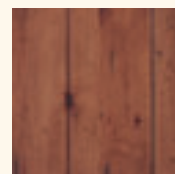

Moreno Speck

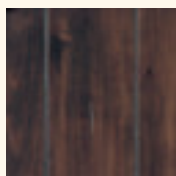

Tequila Speck

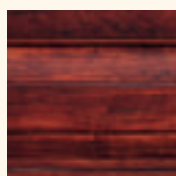

Terra Cotta

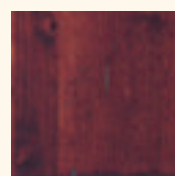

Whiskey

Moreno

Cimararon

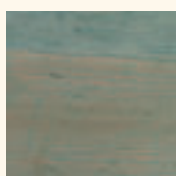

Sangria

Stain colors will absorb to a greater or lesser degree from one piece of wood to the next, even in the same door or window, causing color variations. These are natural variations and should be considered a characteristic unique to each product. Wire brushing causes stain to absorb heavily and will darken the color by as much as two shades.

Finish Selections on Cedar

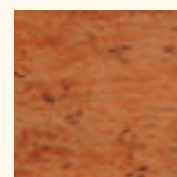

Sagebrush

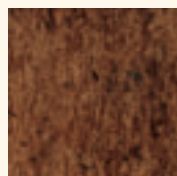

Indigo

Sedona Distress
on Clear Alder,
Tequila Speck Finish.

Sedona Distress
on Clear Alder,
Sandstone Finish.

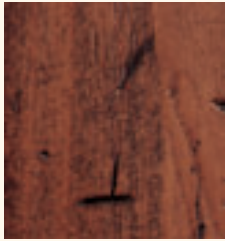

Sedona Distress

Sedona Distress is characterized by deep peck holes and long gouges, and is lighter in effect than Mojave.

Hand Distressing is an application of surface marks and impressions on a door or window that gives the idea of natural age and actual use. In order for the distress marks to appear random and authentic, it is impossible to adhere to a regular pattern like "10 marks per lineal foot consisting of hooks and pecks," as this would make the patterns appear machine-made. Rancho Collection products are not "damaged" in the process of distressing. Distressing is a form of art and results will vary from one product to another.

Mojave Distress

Mojave Distress is heavier in effect than Sedona, and is characterized by long deep gouges and crescents, peck holes and random dents.

Mojave Distress
Clear Alder, Whiskey
finish.

Mojave Distress
Cedar, Sandstone
Finish.

Mojave Distress
Indigo Finish, Clear Alder,
(Please note that the effect
of the distress is diminished by
Indigo and Sagebrush finish colors)

Wire Brush Technique

Wire brushing scratches deeply into the surface of the wood, resulting in a rough, raised-grain texture like aged barn wood.

Closeup of wire-
brush technique with
Terra Cotta Finish,

LIFT AND SLIDE SYSTEMS

Are a creative way to bring the outdoors inside, and the inside out. Advanced European engineering enables you to slide even the most massive doors with incredible ease, opening up entire walls with one turn of the handle. As you rotate the lever, hidden high-tech wheels rotate down and actually elevate the sliding door panel. The door can be smoothly rolled from side to side, and when you want to lock it, simply roll it back to the closed position, rotate the lever and feel the wheels smoothly retract. The massive door settles easily down onto the track and the multi-point lock engages with authority.

Lift and Slide Doors

*Walls of beauty and light
that move freely*

LIFT AND SLIDE DOORS

Let the world in...your way

11.0' and 10.0' wide x 8.0' high Lift and Slide systems painted white. Individual panels measure approximately 5.0' or 6.0' wide.

CUSTOM 15.0' X 9.0' LIFT AND SLIDE SYSTEM

In Genuine Mahogany with Craftsman lite configuration and clear dual glaze glass. Individual panels measure approximately 5.0' x 9.0'.

Partially Open

Fully Open

LIFT AND SLIDE SYSTEM

12.0' x 8.0' Douglas Fir shown closed; Inset photo at right shows the same door partially open. Individual panels measure approximately 6.0' x 8.0'.

CUSTOM LIFT AND SLIDE SYSTEM

in Douglas Fir shown closed above, measuring 26.0' by 8.0'. Individual panels measure approximately 8.6' x 8.0'.

LIFT AND SLIDE SYSTEM

measuring 16.0' x 8.0' in Douglas Fir with custom exposed pocket frame. Sliding panel measures approximately 8.0' x 8.0'.

LIFT AND SLIDE SYSTEM

measuring 26.0' x 9.0' in Genuine Mahogany. This 4-panel system retracts fully into a pocket frame within the wall

LIFT AND SLIDE SYSTEM

measuring 26.0' x 9.0' shown closed from the exterior. Each individual panel measures approximately 6.0' x 9.0'

LIFT AND SLIDE SYSTEM

almost fully open with panels retracted into the pocket frame in the wall.

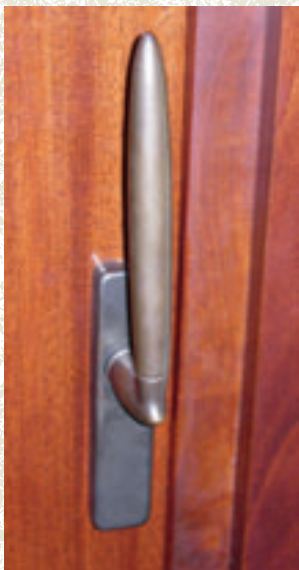

It's a smooth operator

With a gentle twist of the lever, moving panels actually elevate and roll smoothly, so even the largest doors slide with ease.

Double Hung

Art Glass Etc., Inc.

TILT AND TURN WINDOWS

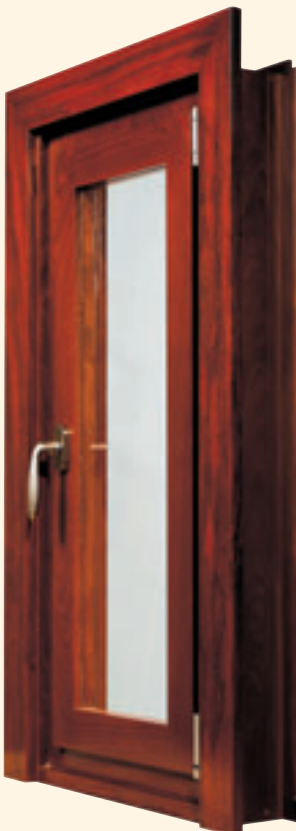

Multi-purpose

Tilt and turn windows give you options. These innovative windows feature European hardware with a gear system on the edge of the sash and corresponding keepers on the frame. A turn of the lever sideways gives you the option of swinging the sash open like a door.

Or, you can tilt the handle up and pull the sash toward you. Now hinged at the bottom, the sash tilts out at an angle.

A fixed screen keeps critters out and lets fresh air in when the window is open. Tilt and turn windows have a minimum width requirement. Please ask your dealer.

5 YEAR WARRANTY

Art Glass Etc., Inc.

ART GLASS ETC., INC. HEADQUARTERS AND MANUFACTURING PLANT
IN VENTURA, CALIFORNIA

YOUR ART GLASS ETC., INC., DEALER:

Craftsman Tiffany Arch Lite Door with Dragonfly glass in Quartersawn White Oak, English Chestnut Finish.

Dear Friends:

Art Glass Etc., Inc. is proud to celebrate twenty years of excellence. Reaching this important milestone gives us occasion to look back to our early days as creators of hand crafted Tiffany reproduction lamps and importers of beveled glass panels for entry doors. We have come a long way since those early days in Chatsworth, California. But we have never forgotten who we are—a family business near the beach in Ventura County, where real people answer the telephones, and real people create exquisite entries and windows with American pride and craftsmanship.

As we celebrate our past, present and future, we are happy to introduce our exciting new Tiffany Craftsman collection doors. This amazing group features authentic hardwoods, unique designs and exquisite hand crafted copper-foiled leaded glass panels. As we look fondly back to our roots as stained glass artists, we invite you to bring these unique, functional works of art into your home. Rest assured that you won't find anything like this anywhere else.

Richard Eletel
President

Please ask your dealer for a copy of the "Art Glass Etc., Inc. 5 Year Limited Warranty" and our "Door Care and Handling Guide."
