

Compost Tea in a Box

Concentrated Liquid Humus, Minerals and Nutrients

Powder and Liquid

Sizes:	25 gallon	SKU:	00E-7001-T25	Orders:	www.Environotics.com
	50 gallon		00E-7002-T50		304-940-8218
	100 gallon		00E-7003-T20		
	200 gallon		00E-7004-T20		

The soil food web encompasses the biological realm beneath our feet. The microbiome is a universe unto itself, teaming with life in a quantity and diversity that boggles the mind. It is the natural balance of broad spectrums of diverse microscopic life in the soil that manifests the strength and health of the ecosystems we rely on as humans on Earth. **Compost Tea in a Box** is a ready to make compost tea kit and is a power source of nutrition and goodness. Compost tea is made with soil microbes in an aerated solution fortified with compost and organic food sources like fish, molasses, and kelp. In the presence of food and aeration, the microbes grow to extraordinary concentrations.

Ingredients: **Compost Tea in a Box** is a plant-luscious feeding solution for the whole Earth! Blended from four extraordinary biodynamic Earth products this Compost Tea creates a synergy of nutrition beneficial to all that grows from roots.

Earth Compound, an authentic, extremely concentrated BioDynamic barrel compost, hand made and perfect for creating compost tea, field spray, watering or hydroponics. Made from cow manure, ground egg and oyster shell, basalt, paramagnetic rock dust, biodynamic humus remedy and silica remedy, clay, compost preparations (yarrow, chamomile, stinging nettles, white oak bark, dandelion and valerian). These ingredients are dynamized by potentization and incubation within the earth for up to a year. The ultimate product is a rich, dark, high quality humus full of beneficial bacteria, fungi, protozoa, nematodes and Cosmic and Earthly energy.

Earth Tonic contains etherically and BioDynamically enhanced open ocean water that contains virtually all Earth bound elements. Every element on the Periodic Table is present as an enzymatic potential called a co-factor. Soil microbes use enzymes for digestion. Earth Tonic is especially suited for hydroponic use and very beneficial for all types of watering applications.

Earth Syrup

Earth Syrup is a dry, natural combination of organic compounds and essential elements responsible for photosynthesis and primary metabolic reactions. It is a carbon based product that ignites the metabolic activities of both soil and plants. Over ten diverse ingredients are blended to a premium hand crafted food that will delight your plants and soil, providing a source of energy for the hungry microbes. Promotes vigorous growth and strengthens all stages of development. Earth Syrup encourages production of primary compounds that make plants smell and taste better.

Earth Kelp is a blended variety of wild harvested kelp from the global oceans, some cold pressed and some low heat dried and micronized. No chemicals or high heat. Earth Kelp is liquified and concentrated, rich with minerals and amino acids. It is a precious gift from the ocean. It is three times as concentrated as other brands, completely water soluble and enhanced with potentized sea water for an abundance of elemental diversity.

The **Vortex Brewer**® is unlike any compost tea brewing system on the market. It has limitless uses, from growing microbes to generating living, energized water.

Not only does the **Vortex Brewer**® create living, organic compost tea, but it acts as an extractor, it will potentize fertilizer recipes, allow for perpetual brewing, and can stir BioEnergetic concoctions for anything from stimulating soil regeneration to concentrating pest or disease control applications. All of this is done through respect for the abilities of water. Water is a magical substance that when used merely to dissolve substances as a delivery system loses its greatest ability to hydrate cells and facilitate the communication of subtle energies.
