

Earth Kelp

Triple Concentrated Plant Growth Stimulator

Liquid

Sizes:	16 ounce	SKU:	00E-7018-EK1	Orders:	www.vironotics.com
	32 ounce		00E-7019-EK2		304-940-8218
	1 gallon		00E-7020-EK3		
	2.5 gallon		00E-7021-EK4		
	5 gallon		00E-7022-EK5		
	55 gallon		00E-7023-EK6		

A precious gift from the oceans. Three times as concentrated as other brands, completely water soluble and enhanced with potentized sea water for an abundance of elemental diversity.

Liquid kelp products are all processed, while how they are processed makes all the difference. We use no chemicals or high heat. **Earth Kelp** is a blended variety of wild harvested kelp from the global oceans. Some types are best cold pressed and others are better when low heat dried and micronized. **Earth Kelp** is completely water soluble, concentrated and rich with minerals and amino acids.

Kelp and ocean water perfectly compliment each other and your garden will get the praise. Bathe your plants in the ocean harvest and watch them burst with goodness. **Earth Kelp** delivers over 70 important nutrients to plants, including vitamins and minerals, some of which are scarce in soils. **Earth Kelp** reduces summer heat stress in plants, it adds valuable micronutrients, natural growth hormones and vitamins that help increase yields, improve soil structure, reduce plant stress during drought and frost. It is also a bio-activator which improves soil conditions and breaks down compost and plant material.

Use **Earth Kelp** as a plant tonic, foliar spray or add it to compost tea.

Directions: Shake well before use. Mix 1/2 gallon of **Earth Kelp** to 5 to 20 gallons of water per acre. Apply in furrow, broadcast spray, fertigation, in hydroponics or as an ingredient in compost tea.

Gardeners: Mix 1 Tablespoon per 5 gallons of water.

Hydroponics: use up to 1 Tablespoon per gallon in reservoir or change.

Ingredients: micronized wild sea kelp, cold pressed wild sea kelp, including *Ascophyllum nodosum* and *Ecklonia maxima*, yucca extract, soluble amino acids, potentized mineral rich sea water.

Guaranteed Analysis: Derived from: Sea Kelp
Soluble Potash (K2O)1.90%

BioDynamic mixtures such as **Earth Kelp** maximize the potential for plant growth by recreating the complete and complex **synergy** between minerals, microbes and enzymes present in nature. Biodynamic farming is the highest level of growing technique which strives to create the best growing environment possible. Bio-dynamic farming provides nutrients to plants, in a sustainable way, with great diversity, resulting in a healthier and stronger crop, that does not decrease the quality of the soil. The ultimate BioDynamic energy creator available is the **Vortex Brewer** used to potentize all liquids just before application.

The **Vortex Brewer**® is unlike any compost tea brewing system on the market. It has limitless uses, from growing microbes to generating living, energized water.

Not only does the **Vortex Brewer**® create living, organic compost tea, but it acts as an extractor, it will potentize fertilizer recipes, allow for perpetual brewing, and can stir BioEnergetic concoctions for anything from stimulating soil regeneration to concentrating pest or disease control applications. All of this is done through respect for the abilities of water. Water is a magical substance that when used merely to dissolve substances as a delivery system loses its greatest ability to hydrate cells and facilitate the communication of subtle energies.
