## Say goodbye to the flooring problems

Hospitality Finishes laminate flooring is exported to around 200 countries and regions all over the world. With the vision of a pioneer, we are bringing a new standard to the flooring industry. It applies a patented 3R Tap&Go locking technology which conquers the multiple problems of floors such as separation, gapping and warping problems. Hospitality Finishes flooring is more stable, more durable, and more Eco-friendly than normal floors. With 3R Tap&Go technology, we will help you say goodbye to the flooring problems!

## Quality From Start To Finish

Millions of dollars have been invested to build the Integrated Manufacturing Base where our flooring is produced. This facility is an industrial model factory integrating garden workshop, ecotypic flats, automatic power-saving manufacture pile line, and dustless workshop.

It promotes sustainable green cycling economy through constructing one million acres of modern forestry base, rebuilding and upgrading 280 thousand square meters of environmentally friendly core production base, enlarging 20 million square meters of low-carbon ecotypic flooring manufacturing base, setting up large-scale modern furniture production base, developing one million acres of forestry and industry three-dimensional project, and building ten thousand square meters of modern research and development center and ten thousand square meters of modern display center. Also, the whole construction of the production base strictly follows international standards ISO19001, ISO140001, CE Authentication, and CARB Authentication.

## Why Hospitality Finishes?

Hospitality Finishes offers the newly designed, innovative Tap&Go locking system in a wide variety of selections to compliment any environment.

Hospitality Finishes' exclusive laminate flooring products create an environmentally elegant and warm interior with high quality, affordable prices. Quality control is consistent during the manufacturing process of our laminate flooring. Hospitality Finishes meets the demands of customers who appreciate better thing.

## Transitions For Finishing your flooring

### Transitions for Selection:

**End Moulding**  
Finishes the space where laminate flooring ends (such as sliding glass doors, along wall bases, door thresholds and carpet).

**T-Moulding**  
Fills the gap at doorways, and finishes spaces between the two areas of laminate flooring.

**Stairnose Moulding**  
Used where laminate flooring meets a step down or landing.

**Reducer**  
To form a natural transition from laminate floor to vinyl or carpet.

**Quarter-Round Moulding**  
The classic finish to your laminate floor; used where wall and flooring meet.

**Scotia**  
Ensure a perfect finished around walls

**Baseboard**  
Bring an Elegant finish to the laminate flooring used around walls. All kinds baseboard are available. Used where wall and flooring meet with both 6cm, 8cm, 9cm & 10cm height available

### WPC Transitions for Selection:

- Waterproof, Mildew-resistant.
- Elegant wood-grain texture and touch.
- No cracking, won't warp or corrode, never splinters.
- No hazardous chemicals, entirely ecological

- More durable.
- Easily installed.
- Dimension stability.

#### Without Long Strip

Applied with screw on plastic block base then clip the skirting on.

#### With Long Strip

Applied with screw within the long strip then cover long strip fixing on the wall.

Alum. & PVC moulding are also available

### Underlayment & Installation Kit

The paving method of ordinary underlay is easy. If assures the flooring to be paved in straight way. It is also moistureproof and noiseproof. Anti-bacteria and Self adhesive underlay double laminated are also available. More colors could be available according to customers' special requirement.

2in White Foam

2in 3mm Blue Foam

Silver Foil Foam 3mm

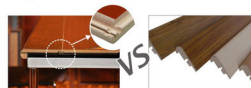

3in1 Self-adhesive Foam

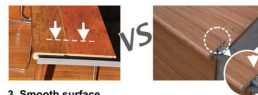

Rubber Hammer

### Tap&Go Stairnose

#### 1. Unique and Innovative design

Tap&Go profiled in stair nose makes it a real unique product.

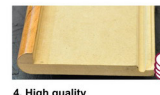

#### 3. Smooth surface

Since it can be installed with tap and go laminate flooring perfectly, omit the word "so" the surfaced installed is very smooth.

#### 2. Easy installation

Can easily be installed with Tap&Go laminate flooring.

#### 4. High quality

Profile of tap and go locking requires a high quality HDF.

## Tap&Go Locking System

Save more, live better

### TAP&GO® Innovative Glueless Locking Technology Flooring

Thank you for choosing TAP & GO flooring. Each type of flooring has its own specific instructions for installation, the success of which requires following the attached guidelines carefully. Please read and follow the instructions to enjoy your quality floor that will last for many years to come.

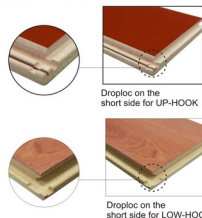

#### TAP&GO® Structure

##### 4-sided Lock-in System Flooring:

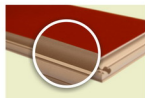

The flexible groove has been uniquely designed and applied to both long and short sides creating a 4 sided locking system that is both strong and secure once installed. TAP&GO's special 4 sided locking technology ensures that installed floors resist separation after installation.

##### Long-side Lock-in System Flooring(Droploc)

The Drop loc structure offers a convenient, user friendly installation even for the novice home user. The system requires less tapping reducing the risk of breakage or splitting upon installation. The combination of the drop loc structure on the short side with the original flexible and strong long side ensures a perfect finish when correctly installed.

### Advantages

#### 1) Trusted Quality Material

TAP&GO floors uses only high quality raw materials, excellent technology and advanced equipment.

#### 2) Stronger Locking

The wider and deeper design of TAP&GO locking system makes TAP&GO locking much stronger, no loosening or departing. Meanwhile, the intelligent Groove in the up hook is an innovative technology, which enables the hook shrink and expands with good elasticity, and firmly locks the planks together in place.

#### 3) Easier installation

Simply installed by tapping in the edge of the planks, one person with a rubber mallet is all that needed.

#### 4) Eco-Friendly

##### Low formaldehyde

TAP&GO locking flooring formaldehyde emission rate is far below than the normal industry standard. Moreover, Tap&Go locking installation requires no glue, which makes the floor more natural and safe.

## Preparation

Patented TAP&GO Locking System Always Excels to Meet and Exceed Your Satisfaction and Offers Exceptional Value. TAP&GO Glueless Locking System Is A Revolution In Laminate Flooring Industry By Its Precision Technology.

## Laminate flooring structure:

- 1. Wearable Overlay**  
Transparent layer is pressure, stain, scratch and wear resistant.
- 2. Overlay**  
Innovative, naturally beautiful, wood grained patterns.
- 3. Moisture Resistant HDF Core**  
High Density fiberboard made of Wet-Land Pine, moisture resistant and Environment friendly.
- 4. Tap & Go innovative locking technology**  
Quality design, simple installation, durable locking.
- 5. Stabilizing layer**  
Balance a floor to be straight, with moisture resistant function.

Tap&Go laminate flooring is probably the biggest single advance in laminate installation technology since this type of flooring was introduced to the market some years ago.

Using a hook joint rather than a traditional tongue and groove or click joint structure, the installer simply places the Tap&Go plank into position and gently taps it into place using a rubber mallet. The savings on installation time and labour costs are considerable!

Using state-of-the-art machinery and technology, Tap&Go is produced in a vertically integrated factory, ensuring that every stage of manufacture is subjected to the strictest quality control conditions.

The High Density Fibreboard (HDF) core is manufactured from wet-land pine grown in our own sustainable forest, and it is in this way we are able to lower formaldehyde emissions, attain higher stability, and better elasticity for the HDF. To accommodate the precision machining required by this advanced installation technology, the HDF core is considerably stronger than normal.
