KION North America

LPG COUNTERBALANCED TRUCK CAPACITY: 5,000 – 6,500 lbs. HT25CT - HT32CT SERIES 1319

Safety

This line of trucks is designed for the demanding conditions of the Class 4 market. The low-mounted propane tank and dashboard, combined with a clearview mast (peri-view) increase all-around visibility. This, together with low noise level and simple operation allow operators to stay alert and maintain unparalleled awareness of their surroundings.

Performance

With its impressive performance, the truck still maintains low fuel consumption and low exhaust emissions. Advanced engine technology combined with the durable drive line, enable the operator to use the truck's capability to maximize productivity. The ergonomic layout of all hydraulic functions allow for a high level of precision control and working performance.

Comfort

Climb on board relaxed, finish the shift relaxed. This truck is designed to the most advanced ergonomic standards. A spacious cab interior with accessibility from both sides of the truck, cowl-mounted hydraulic controls, suspension seat, and functional positioning of easy-actuation controls make for a low-stress working environment.

Reliability/Durability

This machine withstands the most brutal conditions in severe applications thanks to our time-tested engineering, design and manufacturing expertise. Its massive components are designed to operate in adverse conditions and can handle intense utilization with minimum care.

Productivity

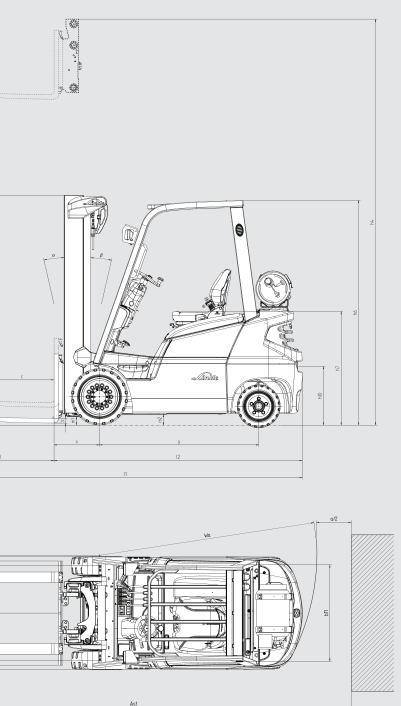

The use of high-quality parts and assemblies allow extended maintenance intervals. At 500 hours, this is among the best in the industry. Confidence in the quality of the machine also allows us to offer an unmatched, standard 3-year or 6000-hour warranty.

FEATURES

Linde Torque Converter Truck

- > Robust
- > Responsive
- > Low maintenance

Rugged Drive Line

- > Massive differential
- > High-torque transmission
- > Wet disc brake

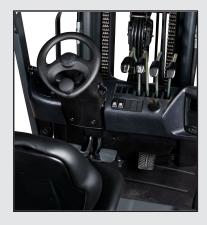

Truck Control

- > Two pedal system, inching & brake
- > Foot operated parking brake
- > Exceptionally responsive steering

Linde Clearview Mast

- > Best peripheral view
- > Least obstructing hose routing
- > Bulkhead hose connection

Linde Hydraulic System

- > Cowl-mounted hydraulic handles
- > Short linkage, precise control
- > High oil volume

Engine

- > 500-hour maintenance interval
- > Fuel injected
- > 2.5 liter, high-torque engine

Linde Operator Compartment

- > Generous foot space
- > On/Off both sides
- > Best all-around view
