MONARCH
Technical Solution

MONARCH

Monarch's Press-On tires are designed to provide maximum comfort, wear and energy efficiency as they help protect your investment in equipment. Our special Monolok® process permanently bonds the rubber to the rim for longer lasting performance. Our special compounds provide unique solutions for your particular tire needs.

Available in three profiles - Flat Profile, Mono-Cushion®, Mono-Grip® Wide - and multiple special compounds, Monarch is the technological solution for all your material handling needs.

Profiles

MONO-CUSHION®

This profile is the heart of the Monarch Press-On line. The crown profile provides a softer ride and easier steering without sacrificing stability or strength. Available in both Plain and Non-Skid.

- Available In Traction And Smooth
- Crown Profile For Easier Steering
- Great Traction
- Smooth Riding
- Available In All Compounds

FLAT PROFILE

This profile provides a greater contact area with the work surface, offering better load distribution and subsequent increased stability. The larger footprint area creates better traction in most applications for both starting and stopping.

- An Average 13% Greater Footprint Than Standard Size
- Cooler Running For Longer Wear
- Improved Performance & Traction
- Increased Operator Comfort
- Available In All Compounds

MONO-GRIP® WIDE

This unique, wide profile tire offers greater surface contact for better traction, better load distribution and less spinning, which results in reduced chipping and longer tire life. The unique tread pattern was designed to offer greater traction based on advanced testing.

- Better Traction From Increased Width and Unique Tread Design
- Longer Tire Life
- Greater Stability
- Better Floor Loading Than Standard Profile
- Available In All Compounds

Only available in specialized lug tread design shown.

DUAL SERVICE™

A premium compound, unique in that it has been proven to perform well on both internal combustion and electric trucks.

- **Low Rolling Resistance Reduces Fuel And Energy Costs**
- **Increased Chip And Chunk Resistance**
- **Available In Smooth And Traction**
- **Good Ride Quality Reduces Driver, Equipment And Load Fatigue**
- **Reduced Heat Build-Up Helps Prolong Tire Life**
- **Longer Lasting Standard Compound Offers Increased Vehicle Productivity**

The Dual Service™ compound lowers fuel consumption and energy cost compared to other standard compounds.

**LONG DISTANCE®
NON-MARKING**

LONG DISTANCE® NON-MARKING

This premium compound is designed for up to 40% longer tread life. Ideal for applications where tread life is essential.

- **Extended Wear - up to 40% Greater Than Standard Non-Marking**
- **Available In Smooth And Traction**
- **Chip And Chunk Resistant**
- **Greater Load Capacity Than Standard Non-Marking**
- **Good Traction And Braking Performance**
- **Extended Wear Translates to Greater Productivity And Cost Savings**

In side by side tests, the Long Distance® Non-Marking compound outlasts other non-marking tires by over 40%.

LION®

Designed for heavier load situations with a 25% greater carrying capacity, this tire offers increased stability as it improves steer tire performance.

- **Longer Tread Wear**
- **Excellent Traction and Braking Performance**
- **Energy Efficient**
- **Cool Running**
- **25% Greater Load Than Dual Service™**

Other Special Compounds: Available upon request.
